

SQL PRACTICE • PC SALES DATASET

Business SQL Questions

10 real-world questions per section to practise SELECT, WHERE, ORDER BY, GROUP BY, AVG and HAVING

6 Sections • 60 Questions

Prepared by: Ketso Sithole

The Dataset

Table: `pc_sales` — each row is one PC sale with 29 columns

Location

Continent, Country/State, Province/City

Shop

Shop Name, Shop Age, Channel, Priority

Product

PC Make, Model, Storage Type, RAM, Capacity

Customer

Name, Surname, Contact, Email, Credit Score

Sales Team

Sales Person Name, Department, Total Sales

Money

Cost, Sale & Market Price, Discount, Finance, Repairs

1

SELECT

"What data do we have?"

1

Give me a full list of all customers with contact number and email.

2

Show every PC we sell with its make, model, and sale price.

3

Which sales people work in our shops, and in what department?

4

List all shops we operate with the city and country they are in.

5

Show the profit on each sale (Sale Price – Cost Price).

6

What are all the different payment methods our customers use?

7

Give me a list of all the distinct PC brands (makes) we stock.

8

Show each sale with how much the customer saved (discount).

9

Display the market price versus our sale price for every PC.

10

List each sale's purchase date and ship date to check delays.

2

WHERE

"Show me only what I care about"

1

Show all sales that were paid for using Finance.

2

Which customers bought online with a High priority order?

3

List sales in Africa where the credit score was above 700.

4

Show every PC sold for more than R20,000.

5

Which sales have no ship date (N/A) — not yet shipped?

6

Find all repairs handled by the Repairs department.

7

Show sales where we gave a discount of more than R500.

8

Which PCs were sold below their market price?

9

List all customers whose surname starts with the letter "B".

10

Show North America sales that were paid in Cash.

3

ORDER BY

"Rank and prioritise for me"

1

Show all sales ranked from the most expensive to the cheapest.

2

List our shops from newest to oldest based on shop age.

3

Rank customers by credit score, highest first.

4

Show all sales ordered by purchase date, most recent first.

5

List every sale by discount amount, biggest discount first.

6

Rank PCs by profit, most profitable first.

7

Show finance deals ordered by finance amount, largest first.

8

List sales people alphabetically by surname, then name.

9

Order sales by cost of repairs, most expensive first.

10

Sort sales by continent, then by country within each continent.

4

GROUP BY

"Summarise it by category"

1

How many sales did we make in each continent?

2

What is the total sales value for each payment method?

3

How many PCs did we sell per brand (make)?

4

What is the total discount we gave out per sales person?

5

How many sales came through each channel (Online vs Offline)?

6

What is the total cost of repairs per department?

7

How many orders fall into each priority level?

8

What is the total sale price generated by each shop?

9

How many PCs were sold for each storage type (SSD vs HDD)?

10

What is the total finance amount taken up per country/state?

5

AVERAGE (AVG)

"What's typical / on average?"

1

What is the average sale price per PC brand (make)?

2

What is the average credit score of Online vs Offline customers?

3

What is the average profit we make per shop?

4

What is the average discount amount given per payment method?

5

What is the average sale price for each storage type?

6

What is the average cost of repairs per department?

7

What is the average sale price per continent?

8

What is the average shop age across each country/state?

9

What is the average finance amount per channel?

10

What is the average customer credit score per priority level?

6 HAVING

1 Which continents have an average sale price above R18,000?

2 Which departments made more than one sale?

3 Which sales people gave out more than R1,000 in total discounts?

4 Which PC brands have an average profit greater than R3,000?

5 Which shops generated total sales of more than R30,000?

6 Which payment methods were used in more than 2 sales?

7 Which countries/states have an average credit score above 650?

8 Which channels have an average sale price above R20,000?

9 Which storage types appear in more than 3 sales?

10 Which continents have total repair costs greater than R3,000?

Bonus Challenge

The Big Management Report

For each country or state, show the number of sales and the average sale price. Only include states averaging above R15,000, and rank them from the highest average sale price down.

Skills used in this one query:

SELECT

WHERE

GROUP BY

AVG

HAVING

ORDER BY
